

Experience Communication in High Definition

Affordable, Accessible Telepresence

In today's fast-moving global economy, project teams, partners and colleagues are distributed around the world. Close coordination and clear communication are essential. But the telephone and email are not enough. Frequent face to face meetings and meaningful dialog are vital for success, but travel is expensive and time consuming.

LifeSize® Conference™ lets you accelerate your global business by creating an immersive, high definition telepresence experience that is realistic and authentic. It lets you do more and travel less. And, unlike most telepresence systems, LifeSize Conference is affordable to organizations and accessible by more employees.

LifeSize Conference brings people together by allowing them to interact successfully across distances. Seeing facial expressions, body language and gestures makes you feel truly connected and understood.

(Do more. Travel less. Be present.)

LifeSize believes the telepresence experience should be available to every knowledge worker who needs to communicate with colleagues around the world. LifeSize Conference makes the power of video affordable and accessible for everyone.

**LifeSize® Conference™
delivers the ultimate
telepresence experience
at a fraction of the cost
of other telepresence
systems.**

LifeSize® Conference™

A complete video infrastructure solution

LifeSize Conference provides organizations, integrators and AV consultants the HD video infrastructure necessary to create custom telepresence suites. Accommodating multiple displays, up to three HD cameras, and integrating a touchscreen control panel, LifeSize Conference creates a telepresence environment that is powerful yet simple to use.

Powerful yet flexible

LifeSize Conference delivers the ultimate in flexibility. Unlike custom telepresence suites that can only communicate with identical systems, LifeSize Conference is standards compliant and can interoperate with nearly any videoconferencing system. Multiple participants in multiple locations can be included in conference, a feature not available in telepresence suites costing hundreds of thousands of dollars. Presentations, documents and multimedia can easily be shared with all participants with a click of the remote.

High definition: An immersive, authentic experience

LifeSize Conference delivers stunning high definition video -- 30 frames per second and 1280x720 screen resolution. But high definition is more than a set of specifications. High definition lets you do more, travel less, and be present.

Do More

Use video to work smarter and accelerate your business. Get the rich interaction of face-to-face interaction and leave the confusion and ambiguity of email and phone calls behind. Share presentations, documents and multimedia with everyone at the same time, allowing dispersed colleagues to collaborate more effectively.

Travel Less

Connect with your colleagues across the globe in seconds instead of wasting hours in airports and on planes. Touch base with business partners in different locations without leaving your office or bring them together for a video conference call. It's simple, cost effective and doesn't require advanced scheduling or a technician, not to mention a passport or plane ticket.

Be Present

LifeSize combines an immersive, high definition video experience with a rich set of features to deliver a powerful, flexible and easy-to-use video communication solution. Telepresence quality high definition video and audio provides authentic user experiences. It allows you to feel as if you are in the same room as colleagues, sharing documents and presentations in real time.

Put the power of telepresence to work for your business

LifeSize believe that high definition video will change the way people communicate. LifeSize Conference delivers the ultimate telepresence experience.
